Core Skills

Art Direction

Visual Strategy · Style Guides · Brand & IP · Multi-Disciplinary Team Leadership · Asset Unification

3D Production

Voxel Art Specialization · Environment Design · Character & Creature Art · Asset Libraries · Level Design · MagicaVoxel · Blender · Photoshop · Low Poly

Technical Art & Engine

Unity 3D · Shaders · Scene Composition · Lighting · VFX & Particle Systems · Rigging · Post-Processing · C# · Git / GitHub · In-Editor Pipeline Tools · Cursor · Claude · Stable Diffusion · Midjourney

Education

University of Windsor

Bachelor of Science (BSc), Computer Science

2015 – 2019

Profile

Lead 3D Artist specializing in voxel, low-poly, and stylized 3D, with the Unity depth to take work from concept to final in-engine polish. Currently directing visuals across **3 titles** at Always Geeky Games, including a live-service game and two new releases targeting **Q4 2026**. Leads a creative team comprising a 2D illustrator, an animator, and a tech artist.

Experience

Art Director

Mar 2026 – Present

Always Geeky Games · Remote · Indie Studio

- **Studio Visual Direction:** Direct visual development across 3 titles (1 live-service, 2 targeting Q4 2026). Set style guidelines, visual strategy, and brand identity so production stays consistent across live-service and upcoming releases.
- **Team Leadership:** Lead a multi-disciplinary creative team comprising a 2D illustrator, an animator, and a tech artist. Guide concepts through to final in-engine polish without stalling delivery.
- **Asset Unification:** Decide which multi-artist assets to keep, polish, or rework, building a single cohesive visual language across the studio slate.

Lead 3D Artist

Aug 2021 – Mar 2026

Always Geeky Games · Remote · Indie Studio

- **Full-Pipeline 3D Execution:** Hands-on 3D modeling and environment production across 2 titles, ~500 weapons & equipment assets, 40+ characters, and 50+ creatures for Voxie Tactics; 4 fully procedural biomes for Voxie Survivor, from concept through to engine-ready Unity implementation.
- **Technical Art & Rigging:** Implement custom shaders, VFX, particle systems, and rigging adjustments directly in-engine, keeping high-fidelity visuals without sacrificing performance.
- **Developer Collaboration:** Manage individual Unity and GitHub pull requests alongside developers for a clean, seamless hand-off pipeline.
- **Workflow Acceleration:** Built in-editor Unity tools in C# using AI-assisted workflows, streamlining the art pipeline and boosting iteration speed on tight schedules.

Web Developer

May 2019 – Aug 2021

MAV Music Agency

- Designed and built web experiences for a music agency, developing the front-end and visual-design foundations that now underpin a developer-fluent approach to art production.

Featured Projects

Hyperflora

Co-Creator & Creative Director · Personal Project · Unity

Built the brand and visual identity from scratch, owning all 3D models, level design, VFX, and characters through to logo design and Steam page key art cuts.

Voxie Tactics

Lead Artist · Always Geeky Games · Unity

Shipped ~500 weapons & equipment assets, 40+ characters, 50+ creatures and all environments. Designed and modelled all items and skins for live-service events.

Voxie Survivor

Lead Artist · Always Geeky Games · Unity

Designed 4 fully procedural biomes covering environments, characters, creatures, and VFX. Modelled all assets in MagicaVoxel; configured real-time lighting, particle systems, custom shaders, and procedural environments in Unity.
